LAYING AVIARY - ALTERNATIVE SYSTEM

- Element length: 2900 mm
- Usable surface: 7.81 m² per linear metre
- 3 continuous nest rows with automatic "rocking" egg expeller **(width 500 or 600 mm)**
- 8 feeding lines and 3 drinking lines designed to stimulate natural movement between levels
- 3 egg belts (50 cm each) for fast and efficient egg collection
- Internal elevated walkway for safe and easy inspection
- Multi-level structure with staggered terraces
- Stainless steel feet for maximum durability even in demanding environments

VOLO ROCCA is the new generation of VALLI aviaries designed to ensure top performance and animal welfare.

A strong, functional, and versatile system, ideal for double-chamber houses where the aviary can be installed against the wall, optimizing every available centimetre.

Thanks to its multi-tier structure with staggered terraces, VOLO ROCCA offers wide usable surfaces, excellent accessibility for operators, and maximum freedom of movement for the birds.

Every detail has been developed to guarantee efficiency, easy management, and compliance with RSPCA Assured standards (Barn, Free-Range, and Organic).

Heights are subjects to decrease due to feet adjustment
